第一周正式课-课后作业 (1)

1

undefined13

• 报错: a is not defined 后面的代码不会执行

• 报错Uncaught ReferenceError let 没有变量提升,而且必须要求等let语句执行完之后,变量才能使用

2

全局fn堆内存AAAFFF000

```
var i = 10;
function x() {
    console.log(i);
}
return x;
```

全局fn堆内存AAAFFF001

```
var i = 20;
y();
```

A私有函数x堆内存AAAFFF111

```
console.log(i);

return x;
```

全局fn堆内存AAAFFF000

fn私有函数堆内存AAAFFF111

全局fn堆内存AAAFFF000

```
console.log(a);
var a=13;
```

第二个 undefined 12 13 a=13 改变全局变量VO中a的值 然后相应的会修改VO中的a的值

第三个 直接报错 a没有声明

9

- 10
- 11
- 3

11

- 3
- 10
- undefined 因为函数没有返回值 所以a没有被定义

12

"hello"

"hello"

"hello"

自执行函数在创建的时候就已经执行了,因为var foo = "hello"在自执行函数的上面,声明和定义已经完成,传入函数中就都是"hello", ||表示如果foo没有被定义则为"world"
